ABOUT

AWS Certified Solutions Architect – Associate and AWS Certified Cloud Practitioner with hands-on experience in building cloud-native and DevSecOps solutions using AWS, Kubernetes, Docker, Terraform, Jenkins, GitHub Actions, and ArgoCD. Passionate about automating deployments, designing scalable cloud infrastructure, and continuously learning modern DevOps practices.

EDUCATION

- **Bachelor of Engineering in Information Technology (2024-2027)**
At Lukhdhirji Engineering College Morbi, Gujarat – 8.74 CGPA (*Current Sem*)
- **Diploma in computer engineering (2021-2024)**
At Om institute of engg. & Tech. Junagadh, Gujarat - 9.72 CGPA

SKILLS

- **Cloud, Containers & Orchestration:** AWS(EC2, IAM, VPC, EKS, CloudWatch), Docker, Kubernetes
- **CI/CD, Automation & Monitoring:** Jenkins, GitHub Actions, Prometheus, Grafana
- **Operating Systems & Networking:** Linux, TCP/IP, DNS, VPC Networking
- **Programming Language:** Java, JavaScript, Bash scripting
- **IaC & GitOps:** Terraform, ArgoCD

CERTIFICATES

- **AWS Certified Solutions Architect - Associate - Amazon Web Services** [Dec 2025 - Dec 2028]
- **AWS Certified Cloud Practitioner - Amazon Web Services** [Oct 2025 - Oct 2028]
- **Galactic Problem Solver - NASA International Space Apps Challenge 2025**

INTERNSHIPS

Microsoft Skill-Based Training Program – Cloud & AI Intern

3 July 2026 – 18 July 2026

- Successfully completed Microsoft's **Cloud & AI Skill-Based Training Program**.
 - Learned **Microsoft Azure** fundamentals, including compute, storage, networking, identity, and cloud architecture.
 - Explored **Azure AI services**, Generative AI concepts, and real-world AI use cases.
 - Strengthened understanding of cloud security, deployment models, and best practices for building scalable cloud solutions.
-

XpertLab Technologies Pvt. Ltd. – Android Development Intern

27 July 2023 – 7 September 2023

- Completed a project-based internship in **Android Application Development**.
- Developed Android applications using **Java** and **XML**, following Android development fundamentals.
- Implemented user interfaces, activity lifecycle, layouts, and event handling for mobile applications.
- Improved problem-solving, debugging, and software development skills while working on practical assignments.

PROJECTS

- **Tetris Game Deployment — End-to-End DevSecOps Pipeline on AWS EKS :**

- Provisioned a complete AWS infrastructure (Jenkins server, IAM, networking) using Terraform, enabling reproducible infrastructure-as-code setup for the entire pipeline.
- Built a Jenkins CI pipeline integrating SonarQube for static code analysis (**SAST**) and OWASP Dependency-Check for vulnerability scanning, enforcing quality gates before deployment.
- Automated Docker image build and push to Docker Hub, followed by GitOps-based continuous deployment using **ArgoCD** to an **AWS EKS** cluster.
- Deployed and managed application on Kubernetes (AWS EKS), configuring ArgoCD with LoadBalancer service exposure for production-style access.

Tech Stack: Terraform · Jenkins · SonarQube · OWASP Dependency-Check · Docker · AWS EKS · ArgoCD · Kubernetes **GitHub:** [jenish-chauhan/End-to-End-k8s-DevSecops-Tetris-Project.git](https://github.com/jenish-chauhan/End-to-End-k8s-DevSecops-Tetris-Project.git)

- **Cloud-Native Food Ordering System:**

- Built and Dockerized a microservices-based full-stack food ordering system (**React, Node.js, MySQL**) with **JWT authentication**, supporting multi-role access for customers and admins across 3 independent services.
- Designed a **GitOps CI/CD pipeline** — GitHub Actions builds and pushes Docker images for backend, frontend, and admin services, then automatically updates image tags via **Kustomize**, triggering **ArgoCD** to sync and deploy changes — cutting deployment time by ~60%.
- Deployed on a **Kubernetes (Kind) cluster on AWS EC2**, with services communicating over a Kubernetes-native network and exposed for browser-based access.

Tech Stack: React · Node.js · MySQL · Docker · Kubernetes (Kind) · GitHub Actions · ArgoCD · Kustomize **GitHub:** [jenish-chauhan/Jerry-s-chaska-Online-Food-order.git](https://github.com/jenish-chauhan/Jerry-s-chaska-Online-Food-order.git)
